Maternal Death Surveillance and Response Systems

Training needs

Join our network | Inform the training

We are establishing a network of health professionals, researchers and managers committed to improving the survival of mothers through maternal death surveillance and response systems (MDSR). This network would facilitate training and the sharing of expertise. Would you be interested in joining such a network? Have you any suggestions about what you would like to achieve from participating? Please add your thoughts and contact details below or respond to the online survey which can be accessed through one of the MDSR room facilitators.

For more information or to join the MDSR Action Network, please:
